| <b>Name:</b> Little Darcy 6341               | <b>Lab Reference #:</b> 959630   |
| <b>Breed:</b> Longhaired Miniature Dachshund | <b>Sample Date:</b> 01/20/2026   |
| <b>Phenotype:</b>                            | <b>Research Date:</b> 01/27/2026 |
| <b>Sex:</b> Unknown                          |                                  |
| <b>Birth:</b> --/--/----                     |                                  |

| Disorder Results(4 of 15)    |     |                                                                              |
|------------------------------|-----|------------------------------------------------------------------------------|
| DM                           | n/n | Clear: Dog is negative for mutation associated with Degenerative Myelopathy. |
| No Testing Selected (Canine) | n/n | No Testing Selected                                                          |
| OI                           | n/n | Clear: Dog is negative for mutation associated with OI.                      |
| cord1                        | n/n | Clear: Dog is negative for the mutation associated with cord1-PRA.           |

| Color Results(5 of 15)     |       |                                                                                               |
|----------------------------|-------|-----------------------------------------------------------------------------------------------|
| A-Locus                    | AY/at | Dog is fawn/sable and carries for tan point gene.                                             |
| B-Locus                    | B/B   | Dog does not carry the mutation for most forms of chocolate coloration.                       |
| D-Locus                    | D/D   | Negative: Dog is negative for the mutation associated with a diluted coat color.              |
| E-Locus (E, EM, eA, eW, e) | e/e   | Dog has two copies of cream/yellow.                                                           |
| K-Locus                    | n/KB  | Both the KB and negative alleles detected; dog can be brindled or express only the base coat. |

## Genetic Testing Report

**Little Darcy 6341**

### Pattern Results(2 of 15)

|         |            |                                                                               |
|---------|------------|-------------------------------------------------------------------------------|
| Merle   | <b>n/n</b> | Clear: Dog is negative for the mutation associated with merle.                |
| S-Locus | <b>n/n</b> | Negative: Dog is negative for the S-Locus. No white spotting will be present. |

### Trait Results(4 of 15)

|                   |                                    |                                                                                                                                                                    |
|-------------------|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Curl 1&2          | <b>n/n</b>                         | The dog is negative for the hair curl allele. The dog will have non-curly hair, and will always pass on the allele responsible for non-curly hair to any offspring |
| Furnishings       | <b>n/n</b>                         | Non-Furnished: Dog is negative for the furnishings mutation.                                                                                                       |
| Hair Length (1-5) | <b>l<sup>1</sup>/l<sup>1</sup></b> | Two copies of the long-hair allele, dog will have longer than average hair per the breed standard.                                                                 |
| Shedding          | <b>n/n</b>                         | Dog has no copies of the shedding allele. The dog will have a low propensity towards shedding.                                                                     |
